SKILLS

- **Languages:** Python, JavaScript, C++, SQL
- **Frontend:** React, Next, Tailwind
- **Backend:** Node, Express, Flask
- **AI/ML:** OpenCV, YOLO (Ultralytics), Data Processing
- **Cloud & DevOps:** AWS, Docker, Git, Linux
- **Other:** REST APIs, System Design

EXPERIENCE

- **Goose Industrial Solutions Pvt Ltd** September 2025 – Present
AI Engineer *Pune, Maharashtra*
 - Built and deployed end to end AI powered web based solutions for industrial automation and monitoring systems.
 - Designed scalable full stack architectures integrating machine learning models with real time dashboards.
 - Worked across frontend, backend and AI pipelines to deliver production ready applications.

PROJECTS

- **Zoladyne Energy Monitoring System (AWS + React + Next.js) – [Github](#)**
 - Developed a real time dashboard for tracking industrial energy consumption.
 - Integrated cloud based pipelines and visualisation tools for analytics and reporting.
- **Milma (Radxa + Docker) – [Github](#)**
 - Developed and deployed containerized dashboard for monitoring industrial operations.
 - Ran the system on Radxa e54c using Docker for portability and efficient resource usage.
 - Built frontend for realtime visualisation and insights.
 - On site deployment with lightweight infrastructure for edge based systems.
- **Milk Crate Counting/Detection (Computer Vision + ML) –**
 - Designed an ML based detection system using OpenCV and YOLO.
 - Automated counting of milk crates from live video feeds.
- **WhatsApp Automation System (Node.js + Meta API + Zoho) - [Github](#)**
 - Developed an automated messaging system for handling workflows and customer responses integrated with Zoho Desk ticketing.
 - Reduced manual workload by automating repetitive queries and workflows..
 - Designed backend for message, processing, routing and service integration.

EDUCATION

- B.Tech in Artificial Intelligence and Data Science — APJ Abdul Kalam University (6.65 CGPA)

PUBLICATIONS

- **Surya Narayanan**, Jayakrishnan A., Jithin K. C. and Reni Jose (2025). *A Novel Approach to Crowd Management using Machine Learning*. International Journal of Future Management Research (IJFMR), 7(3), May - June. | [Paper](#)

ACHIEVEMENTS

- Innovision by NIT Calicut for innovating Crowd Management System | 2024
- Recognition Award for organizing national level hackathon (Karthavya) | 2023
- Google Play Store listing certification | 2023
